DETAILED ACTION

1. The amendment filed on November 9, 2004 has been received.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites the limitation "the adjustable valve portion" in lines 3-4. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the adjustable valve portion" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 recites the limitation "the adjustable valve portion" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Driessen (US Patent 5,113,979).

Re-claim 16 Driessen disclosed, as shown in fig. 1-5, a damper for absorbing vibration transmitted between a sprung mass and an un-sprung mass of a vehicle, the damper comprising: a cylindrical outer housing 38 containing a first fluid chamber 44 and a second fluid chamber 52, the first fluid chamber being coaxially aligned with the second fluid chamber; and an adjustable valve portion 92 connecting the first fluid chamber with the second fluid chamber, the adjustable valve portion defining damping characteristics by providing a variable flow resistance (see col. 2, lines 27-36) between the first fluid chamber and the second fluid chamber responsive to an external signal 34, the adjustable valve portion having a cylindrical outer surface axially aligned with the first fluid chamber and the second fluid chamber.

6. Claims 4-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

7. Claims 1,2, 7-10, and 13-15 are allowed.

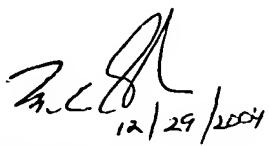

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mariano Sy whose telephone number is 703-308-3427. The examiner can normally be reached on Mon.-Fri. from 9:00 A.M. to 3:00 P.M.
